

DESIGN PROCESS

RESIDENT IMPACT

SURVEYING

- A surveyor goes to each property & evaluates elevation, trees, downspouts, & water flow patterns.
- Surveying produces data to develop the Blueprint solution for your neighborhood.

SITE SURVEYS
TO
COLLECT
DATA

WHAT THIS MEANS FOR YOU

- You will receive a letter notifying you of surveying activities.
- You may see surveyors around your property. They will have a City of Columbus badge. Please direct any questions to Blueprint Columbus Outreach Team.

30% DESIGN

- Survey data is analyzed by design engineers who propose various Blueprint solutions.
- A parking study is completed.
- POTENTIAL locations for green infrastructure are identified.

PUBLIC
MEETING!

- All residents are invited to attend a public meeting. Look for it in your mail!
- Residents who are directly impacted by potential locations for green infrastructure receive additional notification by the Blueprint Outreach team.
- Feedback is welcome. Call or email us!

60% DESIGN

- Design engineers modify plans based on feedback from the community & additional investigation.
- PREFERRED green infrastructure locations are identified.
- Plans are routed through other City departments.
- Green infrastructure map available online.

SITE REVIEWS
WITH
HOME
OWNERS

- Green infrastructure locations marked in the right-of-way to allow residents to identify them and provide feedback.
- Contact the Blueprint Outreach team to schedule a site review of a specific green infrastructure location.
- Some modifications can still be made at this phase. Please contact us!

75-90% DESIGN

- Final plans are developed with feedback from City departments & the community.
- Signatures from 6 different individuals must be obtained in order for the design to be approved.

PRESENT
TO
COMMISSION

- The Blueprint Team will present the final plans to the area commission.
- Residents can submit planting requests for rain gardens.
- Plans are near completion and, while we always want your feedback, changes are difficult to make at this stage of design.

100% DESIGN

- Design is complete.
- Engineers meet with the construction manager to proceed with project.

- A pre-construction meeting, open to the public, is held to review construction schedule and processes.
